* EPA estimates heating and cooling energy costs typically represent 50% of the home's total monthly energy bills.

Insulation Job Quote

Please complete this form to properly estimate a home for re-insulation.

- Existing Insulation R-Value R - _____
- Additional Insulation R -Value Finished Attic R = _____ R - _____
- Square feet of Attic space _____
- Number of soffit vents (one raft-R-mate[®] vent chute per vent) _____
- Number of Attic Access holes/stair access to be insulated _____
- How many recessed lights to be protected? _____

Total Job Estimate _____

Bring Home Savings & Comfort Today with Owens Corning's Roofing Shingles and AttiCat® System

Why Ventilate and Insulate? Trapped heat and moisture in the attic can severely jeopardize the performance of a roof. The combination of insulation and a ventilation system helps to keep excessive household moisture and heat out. As a result, the proper conditions and temperature are better maintained in the attic and on the roof deck throughout the year. An under-insulated home means you're paying higher heating and cooling bills. Ventilate and Insulate today and stop throwing money away.

Why Now? It's easy - by ventilating and insulating now with the trusted Owens Corning brand of products, you can save the following ways:

1. Receive a tax credit of 10% on the cost of qualified materials through Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act¹ (H.R. 4853), section 25C Non-Business Energy Property, up to a maximum of \$500 .¹
2. Reduce your home's heating and cooling costs by up to 20%.²
3. State and local utility rebates available for energy efficiency home improvements.³
4. Recoup some of your insurance deductible if replacing your roof due to storm damage.

Insulate Now. Protect your roof. Save Money and energy and help save the planet. The performance of your new roof goes a lot deeper than the new shingles. It takes a complete system - including ventilation and insulation products to maximize performance. Add Owens Corning PINK FIBERGLAS™ Blown-In Insulation with our durable shingle products, from a brand you can trust. Protecting your roof while saving money and energy begins with a home energy audit...it's a perfect job for your Top of the House® certified preferred contractor.

Certified by Scientific Certification Systems (SCS), an independent, third-party evaluation and certification service for recycled content.

ENERGY STAR is a registered trademark of the Environmental Protection Agency.

The GREENGUARD INDOOR AIR QUALITY CERTIFIED Mark is a registered certification mark used under license through the GREENGUARD Environmental Institute

Savings will vary and apply to heating and cooling bills in a properly insulated and air sealed home. For details go to http://www.energystar.gov/index.cfm?c=home_sealing.hm_improvement_methodology. Savings vary. Find out Why in the seller's fact sheet on R-values. Higher R-values mean greater insulating power.

Top of the House® Contractors are independent contractors and are neither affiliated with nor agents of Owens Corning.

¹ For qualified energy-efficiency improvements. The federal tax credit cap is now \$500. Consult your tax advisor or visit www.energystar.gov for more information.
